“Economics is like a kind of philosophy. It trains your ability of critical thinking, mathematical calculation, logical deduction and academic writing. No matter you are a science student or an art student, you will always find the charm of Economics. If you want to make yourself more comprehensive, feel brave to choose Economics. It will not depress you! I have received many offers from top universities of the UK, Netherlands, Canada, Germany, and Spain and so on. Finally, I chose McGill University, the nominated as “Harvard” in Canada.

Part of the UK Nottingham School of Economics, a top ranked economics department, we provide students with a rigorous training in economics and econometrics. Studying the same programmes and modules as in the Nottingham campus (with opportunities for international exchanges), our students receive a high quality degree in the best traditions of British higher education but in the dynamic setting of modern China.

Our programmes combine the core analytical and quantitative techniques required by modern economics with in depth study of topical issues, informed by the research of academics who are pushing forward the boundaries of the subject. Our students study economics at an advanced level, with a variety of specialist modules taught in an interactive manner that encourages creativity, originality and critical thinking.

The School has particular strengths in fields such as econometrics, where Nottingham alumni, Sir Clive Granger, won a Nobel Prize and international economics.

Our students achieve great success after graduation: most of our undergraduates enter top 100 world universities for further study on Masters in economics, finance, business and related disciplines. They are highly sought after in the job market, because our programmes require a balance of intellectual abilities: numerical, analytical and verbal. We develop a variety of skills that are important for employability: data analysis, problem solving, report writing, oral presentations and teamwork.

Whatever your ambitions, our aim is to help you achieve them here at UNNC.

### International students

For undergraduate degrees, although the majority of our international applicants will have A levels, we welcome and value a wide range of alternative qualifications. Our admissions process recognises that applicants have a wealth of different experiences and may have followed various educational pathways.

For our masters degrees, as a general rule, you are expected to hold an honours degree at 2:1 level or above (or international equivalent) in an appropriate subject. Evidence of relevant personal, professional and educational experience may also be taken into consideration.

In addition to meeting the academic entry requirements, international students whose first language is not English or whose entry qualification was not obtained in the medium of English, are required to provide evidence of their proficiency in English language.
