“ Economics is like a kind of philosophy. It trains your ability of critical thinking, mathematical calculation, logical deduction and academic writing. No matter you are a science student or an art student, you will always find the charm of Economics. If you want to make yourself more comprehensive, feel brave to choose Economics. It will not depress you! I have received many offers from top universities of the UK, Netherlands, Canada, Germany, and Spain and so on. Finally, I chose McGill University, the nominated as “Harvard” in Canada.

Part of the UK Nottingham School of Economics, a top ranked economics department, we provide students with a rigorous training in economics and econometrics. Studying the same programmes and modules as in the Nottingham campus (with opportunities for international exchanges), our students receive a high quality degree in the best traditions of British higher education but in the dynamic setting of modern China.

Our programmes combine the core analytical and quantitative techniques required by modern economics with in depth study of topical issues, informed by the research of academics who are pushing forward the boundaries of the subject. Our students study economics at an advanced level, with a variety of specialist modules taught in an interactive manner that encourages creativity, originality and critical thinking.

The School has particular strengths in fields such as econometrics, where Nottingham alumni, Sir Clive Granger, won a Nobel Prize and international economics.

Our students achieve great success after graduation: most of our undergraduates enter top 100 world universities for further study on Masters in economics, finance, business and related disciplines. They are highly sought after in the job market, because our programmes require a balance of intellectual abilities: numerical, analytical and verbal. We develop a variety of skills that are important for employability: data analysis, problem solving, report writing, oral presentations and teamwork.

Whatever your ambitions, our aim to is help you achieve them here at UNNC.

Teaching

The majority of teaching is delivered through lectures, supported by a tutorial programme and seminars. Outside taught hours, you will be expected to spend time reading and researching for written assignments.

Tutorials and Support

As a student in the school, you will be supported by personal tutors, who arrange individual meetings each semester to review progress, offer guidance on module choices and careers, and provide general pastoral care. At the Language Centre we aim to provide you with the language skills and competencies to communicate effectively in everyday life and work settings, skills which are much sought after by potential employers.

All the language modules are taught with a blended learning approach, to help our students to develop digital literacy and essential skills such as team work, independent learning, time management and collaborative work. Students can find online resources on our LMS system (Moodle) and in-class activities where students can interact, discuss and acquire a global awareness that allows them to appreciate diversity and multiculturalism.

What's on offer

Experienced international staff provide language classes from Beginners (stage 1) to Advanced (stage 5 or 6) and offer 10 and 20 credit modules in 6 languages with various entry points depending on previous language learning experience.

- French
- German
- Japanese
- Korean
- Mandarin (for international students)
- Spanish

We offer a wide range of extra-curricular activities in all languages to promote collaborative work, cultural exchange and enhancement of soft skills. We have our own magazine Cosmo&LC, and we organise cultural events where students are able to demonstrate their proficiency.

In 2022, the Language Centre began an association with the Chartered Institute of Linguists (CIOL), the UK's most distinguished body for Language Professionals. Our programmes at Level 3 and above have been Validated by the CIOL and many of our team members have been granted Member status (MCIL).
